CV SMART CHOICE *news*

Steering you in the right direction

Steering gears drive the operating mechanism of the steering system. Worn or damaged gears can leak fluid, reducing the performance and reliability of the vehicle's power steering system.

A vehicle with anything less than perfect steering is a danger to the driver and other road users. Vehicle recovery and repair is so expensive that vehicle downtime is something fleet owners want to avoid.

Tested in the lab, controlled throughout production, then perfected on the road, you can choose TRW's Proequip heavy commercial vehicle steering and suspension parts with complete confidence. Facilities, tools and test equipment have been developed for the HCV range, with processes controlled by the latest software.

TRW Proequip steering gears use the highest quality materials - TRW's own OE components - offering superior performance, reliability and safety. TRW manufacture the major components of the steering and suspension system including

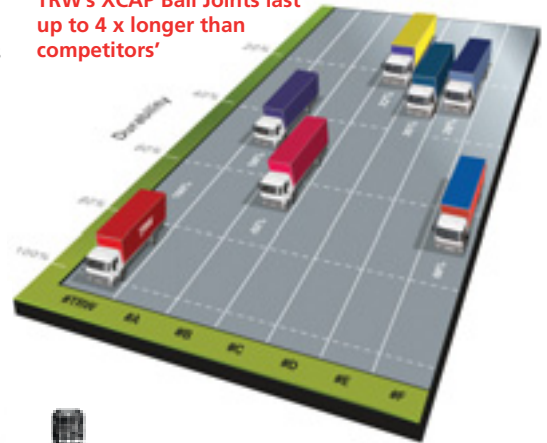

steering columns, steering pumps, steering gears, pitman arms, tie rods, tie rod ends, v-links and radius rods.

A global innovator of the safest steering and suspension parts, TRW has developed the very latest future-forward OE technology XCAP range. Smaller, stronger and more durable, the range features enhanced dust covers and improved steering comfort due to reduced torque. XCAP ball joints last up to four times longer than competitor parts!

Call your local IFA Member to order.

TRW's XCAP Ball Joints last up to 4 x longer than competitors'

LED lighting - more cost-effective than you think?

LED lighting technology offers a host of advantages to end users and now is becoming a more cost-effective option. Extended service life (usually maintenance free), excellent light output from compact designs and low current draw (less strain on alternators and batteries) are valuable benefits.

ESG (ECCO Safety Group) is a worldwide leader in CV warning and safety products, including directional LEDs, beacons, lightbars, back-up alarms, CCTV, worklamps and LED utility bars.

Their UK companies include ECCO, Britax and Premier Hazard.

Contact your local IFA Member to order and to request the latest product guide.

Smart Choice CV Issue 2 Winners

Issue 2 featured a bundle of VISION lamps kindly donated by The Workshop Warehouse as a reward for the customer acquiring the most garage equipment in Feb/Mar/Apr '15. Mr. Graham Deacon of Deacon Truck & Trailer Ltd is pictured below, scooping up the bundle, following his purchases from Truck & Trailer Specialists Ltd, with our congratulations. A FREE EHL190 also went to each of the individual IFA Member company's top spender:

Devon Fleet: Stan Robinsons • Fleetwheel: John Gwynne Commercials • Fyfes: Muldoon Transport Systems Ltd • Hereward Car & Truck Components: Neville Tilley Transport • HGV Direct: Collins Earthworks Ltd • Linings & Hoses: Mansfield Group • Multitruck: G A Auto Electrical • Picksons: Border 4x4 • Truck Parts North Wales: Car2Commercial • Wrightpart: Colets Piling Ltd

Expert Quality CV Tools

Cordless Grease Gun 18V (60992)

- Impressive 8,000 psi high-pressure output
- Takes standard 400g grease cartridge (bulk or manual filled)
- 2 x 18V Ni-Cd battery packs & 1 hr charger
- Chromed steel canister
- Rubber reinforced tube
- High pressure grease nipple
- Constant 70g/min flow rate

ONLY
£119.95

CV Boot Band Kit 3pc (30784)

- Cut, tension & clamp CV joint band correctly
- 200mm CV boot band cutters (for use on CV bands up to 6mm wide)
- 225mm CV band cutting tool
- 240mm CV pliers (tighten ear-type CV bands)
- Reinforced 1/2" sq. dr. handle recesses for breaker bar or torque wrench

ONLY
£44.95

Induction Heating Tool (80808)

- Ideal for freeing seized fixings & fasteners
- Easy-to-use, simply install appropriate coil & place over/around ferrous metal to be heated
- Efficient, safe heating of metallic conductive parts compared to traditional methods
- 2 x Direct coils: 19mm, 26mm
- 1 x Flex coil, 1 x Pad coil

ONLY
£495.00

HGV Clutch Alignment Tool 6pc (41803)

- Fast, accurate alignment of flywheel pilot hole with clutch drive plate
- Precision manufactured
- 2 x Expanding mandrels: Ø 36-44mm, Ø 44-52mm
- 4 x Steel screw-in location pins: Ø 20mm, 25mm, 27mm & 30mm
- Robust case

ONLY

One of these products is Genuine OE manufactured, the other is reconditioned. They both look the same – but that’s where the similarity ends!

One is 7 years old, has already performed millions of brake operations, has been cleaned, re-sprayed, and had the seals replaced. Would you fit this to your vehicle?

The genuine part is entirely brand new and has guaranteed quality, reliability and safety built-in. Why wouldn’t you fit this to your vehicle?

Make sure you can identify the suspect.

Always specify genuine Knorr-Bremse parts. Made using the finest materials and techniques, setting new standards in quality control and guaranteed to last longer and be more cost effective in the long run than reconditioned product.

Contact your local IFA Member for genuine KNORR-BREMSE parts

Oil Fired Cabinet Heaters

- BSO models - use with 28 second fuel (paraffin or kerosene) or 35 second fuel (heating oil/diesel) (connect to bulk fuel tank)
- 13 Models - heat outputs up to 381kW (1.3M Btu/hr)
- Electro-zinc coated steel cabinet, inner heat shield skin, outer skin epoxy powder coat finished
- Centrifugal air circulation enhances life expectancy
- Models BSO30 to BSO85: direct drive fans, 1ph motor
- Model BSO120: 3ph motor & v-belt drive
- Combustion air inlet kit as standard
- Thermostat, time control, oil filter & fire valve
- Main fan filter kits available for dusty/hazardous places
- Extra cost: flue kit (from £270)

FROM
£2099
5 Year Lease £11.17 pw

Standard flue kits (extra) provide
4.6m ground clearance:
FK5 Flue Kit for BSO30 & 40 (Ø 5")
FK6 for BSO60 (Ø 6")
FK7 for BSO85 & 120 (Ø 7")

Model	Nett Heat Output	Fan Capacity	Swivel Heads	Consumption	Supply
BSO30	109,000 Btu/hr	2196 m ³ /hr	2	3.43 L/hr	230V
BSO40	146,440 Btu/hr	2556 m ³ /hr	2	4.67 L/hr	230V

BSO85	280,530 Btu/hr	5004 m ³ /hr	3	9.10 L/hr	230V
BSO120	418,000 Btu/hr	7740 m ³ /hr	3	13.30 L/hr	415V

Suspended Unit Heaters

- Available for heating oil, natural gas or propane fuels
- Oil Fired: heat capacities 31kW to 98kW
- Gas Fired: heat outputs 15kW to 84kW with roof or wall flue exit
- Suspend or mount (on a suitable non-combustible support)
- Four M10 suspension points provided
- Free-blowing or ducted models
- Installation service (in most areas)
- **Huge range - call your local IFA Member to arrange a site visit to determine the right model for your space**

Automatic Ignition Used Oil Heaters

- Clean combustion, high efficiency
- Large airflow blower fans & large capacity fuel tanks
- Fan-only for summer ventilation
- Burners adjustable for heating oil or diesel
- Basic room thermostat standard
- Optional digital thermostat / time control
- Compressed air supply required for burner
- Available (extra cost):
 - Flue Kit (from £269)
 - Motor/Pump kits for connection to bulk fuel tank
 - Fire Valves, Magnetic Valves & High Pressure Filters for use with Pump Kits

These units must be connected to a suitable flue system (min. 1m above roof apex & 6m above ground level).
A full range of flue accessories is available. Complete flue kits include roof seal, fitting kit & two wall bands.

Stainless steel flue kits provide 6m ground clearance:
98.085.746 for SB40
98.085.100 for SB60
98.085.170 for SB80 & SB110

Optional extras (additional cost):
98.085.399 Motor/Pump kit - for connection to bulk fuel tank with bottom outlet, gravity fed. Max distance 10m. (Pipework/electric cable not included)
98.087.161 Motor/Pump kit - for connection to bulk fuel tank with top outlet &/or above 10m distance. (Pipework/electric cable not included)
98.085.890 Digital Stat/Timer
98.085.541 Main Fan Filter kit (SB40 & SB60)
98.085.542 Main Fan Filter kit (SB80 & SB110)

How much heat do I need?

Providing a 'comfortable' working temperature is necessary both for people to work safely/productively and a legal requirement. But how do you work out how much heat you need, so that you can specify and purchase the right heater(s)? Important factors:

- The standard of insulation in your building
- How much warm air escapes through frequently opened doors
- The outside temperature
- The comfortable temperature for people moving about (and so generating some body heat) is 15°C (59°F)
- Calculations of how much heat is required are based on a ΔT of 20°C (i.e. ambient temperature -5°C, required temperature +15°C)

Which description best fits the building or space that you want to heat?

No insulation (e.g. corrugated sheet doors frequently opened)
Z = 9 Btu/cu.ft

Average insulation (e.g. double skin brick or block), windows single glazed, roof insulated, doors not opened much
Z = 5 Btu/cu.ft

Poor insulation (e.g. single skin brick or block) some single glazed windows, doors opened fairly often
Z = 7 Btu/cu.ft

Good insulation (e.g. blocks plus cladding with insulation between), few or double-glazed windows, doors rarely opened
Z = 3 Btu/cu.ft

Here is your step by step guide for working out how much heat you need:

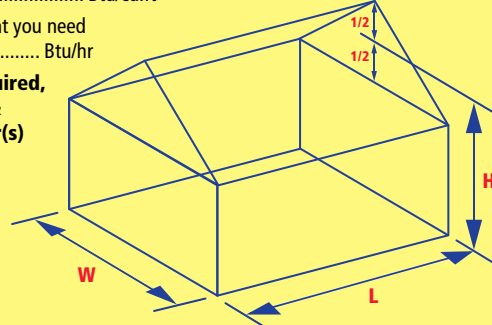

1. To calculate the volume to be heated, first note the dimensions of the space you are heating:
Length (L) feet
Width (W) feet
Average Height (H) feet
2. Multiply (L) x (W) x (H) = Volume (V) cubic feet
3. Select the best description for the space to be heated from the box alongside & fill in (Z) Btu/cu.ft
4. To calculate how much heat you need
Multiply (V) x (Z) = Btu/hr

This is the total heat required, enabling you to specify & purchase the right heater(s)

HINT: A building with no insulation in an area that experiences extremely adverse weather conditions may require up to 9 Btu/cu.ft, so Z = 9 Btu/cu.ft

TOP TIP: For general calculation we recommend Z = 5 Btu/cu.ft

* 1 cubic metre = 35 cubic feet

All the heat you need!

We offer a full range of heaters, downflow fans, dehumidifiers, etc. Ask your local IFA Member for more details.

ALL Thermobile prices are for supply only, UK Mainland. Installation is available at an additional cost

- 230V (16A) Supply
- Latching system for 2 or 4 touch control

- TIG:**
- Easy starting
 - Very high duty cycle: 200A @ 60% TIG output
 - 10A to 200A Welding current
 - Weld thickness 0.3mm to 5mm
 - Pulse for v. thin material

- ARC:**
- Very high duty cycle: 180A @ 60% ARC output
 - 10A to 180A welding current
 - Electrode size: 1.6mm to 4mm
 - Weld thickness: 1.1mm to 7.2mm
 - Anti-stick circuitry

ONLY £849.98

EXCLUSIVE IFA PACKAGE

FREE Headshield & Foot Pedal WORTH OVER £175!

09178CV4 Hiton HP125 Universal Oil Heater

- Efficient, clean, virtually soot-free combustion using waste oil/diesel
- Burns most engine oils (mineral, synthetic), gear & hydraulic oils
- 230V (13A) Supply
- Min. heat output: 72,000 BTU/hr (21kW)
- Max. heat output: 102,400 BTU/hr (30kW)
- Approx. heating area: 668m³ (24,297 cu.ft)
- Fuel consumption:
 - Min. output: 1.8 kg/hr (2.14 ltr/hr)
 - Max. output: 2.9 litres/hr (3.44 ltr/hr)
- 50 Litre fuel tank capacity
- Heavy duty painted finish
- Flue included (150mm Ø)
- Fan assisted

MADE IN EU

ONLY £1,299

5 Year Lease £6.91 pw

05300CV4 Airmate PX3/150 Belt Drive Compressor

- 230V (16A) Supply
- 150 Litre air receiver
- 3.0hp (2.2kW) Motor
- Multi-finned flywheel improves cooling; cast iron barrel
- 16.0 CFM (453 litres/min) Piston displacement
- Max. free air delivery (F.A.D) 10.7 CFM (303 litres/min)
- Max. pressure 145psi (10 bar)

ONLY £469.98

EXCLUSIVE IFA PACKAGE
FREE Set of 4 Anti-Vibration Mounts (02357ACV4)

Suspension

Airsprings
Shock Absorbers
Truck & Trailer Springs

Air Brakes

Brake Chambers
Slack Adjusters

Braking

Brake Drums & Discs
Brake Pads
Brake Calipers
